Lining-Out

and

Specimen Stock

Spring 1937

The Tingle Nursery Co.
Pittsville, Maryland.

Business Information

Most everyone agrees that business is better. The problem in the nursery trade is where to get good stock, especially the smaller sizes and lining-out stock. We had to refund more money for stock last spring that we were unable to furnish than we have ever done in any previous two seasons together. Good stock is still scarce in many items. Suggest you make arrangements for your requirements early. All our stock is sold by catalog or to purchasers coming to our nursery and buying after seeing the stock. We expect repeat orders only on the values and service we give you. May we serve you?

PRICES named in this Trade List apply only to orders placed by nurserymen, florists and dealers.

PACKING. All goods are packed in boxes or bales for which we charge sufficient to cover cost of material used.

CLAIMS, if any, must be made immediately upon receipt of goods, and if just made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.

TERMS: We offer the usual terms; net 30 days from date of shipment to those of known responsibility but must have satisfactory business references from others or remittance must cover order. Those desiring stock shipped by express C. O. D. will please remit ¼th the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP. Whether by freight or express and give railroad delivery if by freight. This may help in getting the stock to you with the least delay possible.

THESE PRICES are in effect for Spring 1937 season.

Plan To Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We have many items in too small lots to list. Among them there may be some that you are especially desirous of securing. If you are not familiar with the varieties we are offering we will send you a descriptive list of most of the stock offered herein, if you will ask for it.

We are located on the Eastern Shore of Maryland, about 100 miles directly south of Wilmington, Delaware. See the road map on fourth cover page.

Ornamental Stock

We are exerting every effort to produce the very best stock that can be grown, and in our thirty year's experience we believe we have never offered bigger values than we are offering this season. We feel sure you will be more than pleased with the stock we send you.

From the reports we have received from many parts of the country Lining-Out stock is the scarcest it has been in a good many years therefore advise ordering early.

Quantities: 1 to 5 at the each rate, 5 or more at the 10 rate, 25 or more at the 100 rate, 250 or more at the 1000 rate.

Azaleas---One of our Specialties

KURUME AZALEAS

The Kurume Azaleas have been known to America only about 15 years, but in that time they have made wonderful progress as hardly a garden but what has one or more varieties of this wonderful type of Azaleas. They are also well adapted to forcing—thousands of them being sold for Mother's Day, Easter and Decoration Day. They are comparatively easy to grow and they make such a wonderful display that the demand is continually increasing. Many of the varieties are hardy out of doors as far north as Long Island. They are extremely floriferous, and in season the blossoms completely cover the leaves. The colors are of almost every hue and shade as you will find below.

Varieties with an asterisk * are the hose-in-hose or double type.

Each X means one transplanting.

Our 1-yr. field beds XX trans. have been grown in the greenhouse one year and in outside beds one year thus making them really two years old. The 2-yr. in field beds XX trans. are two years from greenhouse and thus three years old.

	Each	10	100
AMOENA.* Flowers rosy purple, in dense masses. Hardy and early flowering. The foliage assumes a pleasing bronze tint in the fall and winter months.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several year's tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts.

Our 1-yr. field beds XX trans. have been grown in the greenhouse one year and in outside beds one year thus making them really two years old. The 2-yr. in field beds XX trans. are two years from greenhouse and thus three years old.

NEW U. S. D. A. AZALEAS

A group of new varieties of this wonderful June-blooming hardy evergreen Azalea released by the U. S. Department of Agriculture. Most of these were collected by the Department at the Agricultural College, Imperial University Komaba, in Tokyo, Japan. They have been tried out by the U. S. Department of Agriculture staff and other interested growers and have been selected as being worthy of introduction in this country. We were one of the original growers selected to propagate these for the trade.

In ordering these Azaleas please use the number following the name, this will insure getting the variety wanted.

AZALEAS AND CAMELLIAS By H. H. Hume

Interest in Azaleas and Rhododendrons is greatly increasing. Until now, little information on varieties, care, and culture of these plants has been available. Mr. Hume accurately and thoroughly describes the varieties best suited for various uses and discusses questions on culture, such as soils, fertilization, planting, propagating, and general care, indoors and out. He has taken special care to describe accurately the several groups and varieties, and his suggestions on the use and culture are very practical. If you are growing Azaleas and Rhododendrons you will find this book much help. While the book is titled Azaleas and Camellias it applies equally to Rhododendrons. $1.50.

ARNOLDIANA AZALEAS

In 1914 the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass. created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amoena. Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

Considering their hardiness, their ultimate size, bushy form, splendid foliage, abundant bloom and desirable shades of color, they well deserve the distinction as "the most outstanding achievement in American plant breeding in many years."

All are happiest when grown in full sunlight. They are deciduous in the north but evergreen here. The reddish-bronze colored autumn foliage is very pleasing.

INDICA AZALEAS

The Indica Azaleas are the most attractive winter flowering shrubs in the south. Varieties of Azalea Indica coming into flower when so little else is in bloom are a mass of beauty on private estates of the south in early spring.

While these Indica Azaleas are not dependably hardy, even this far north, we believe they would make one of the best pot-grown Azaleas for forcing and selling in the northern markets. It would be no trouble to have them in bloom by Christmas. Both of the sizes we are offering are nice bushy plants, just right to go ahead with.

ARISTOCRATS OF THE GARDEN By Ernest H. Wilson.

Undoubtedly the books you must have if you want to know about the newest introductions in plants. Also contain much information about the older varieties. Tells where a good many of the plants offered herein came from, their habits, where to use them and a mine of other useful information. More interesting than any other book of adventure or even your favorite detective story. Two volumes in the set for $10.00 and worth it.

No Japanese Beetles In Our Nursery

After scouting and inspection several times during the past season by the Federal and Satte inspectors they have again classed our nursery as being free from the Japanese Beetle. Therefore you may send us your order without in any way running the risk of getting any beetles in a shipment from us. A Federal Permit and State Inspection Certificate certifying to the above will be attached to all shipments outside of the Japanese Beetle area.

We have been growing Strawberry Plants over 30 years. Let us furnish plants to fill your orders this season. Will ship to you or direct to your customers. See pages 45 and 46.

Boxwood

Boxwood is another of our specialties and by growing it in the quantities we do (over a quarter million now), we are enabled to furnish it at these very low prices. This Boxwood is first class in every way. We have customers who send us repeat orders several times during a season. We know you will like our Boxwood if you will let us send you some of it. **Good Stock, Good Service and Low Prices.**

AS GOOD AS CAN BE GROWN

We are exerting every effort to produce the very best stock that can be grown, and in our thirty year's experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of lining-out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you will give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

All Lining-Out sizes are marked by an *. Sizes not so marked are classed as Specimen Stock.

Ilex (Holly)

We consider the Holly one of the very best ornamental trees or shrubs. Nothing is prettier than one of our American Hollies with great clusters of bright red berries and dark green leaves shining above the snow in winter. The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell. We believe there is money in growing them and will increase our stocks as fast as we can.

All Lining-Out sizes are marked by an *. Sizes not so marked are classed as Specimen Stock.

	Each	10	100	1000
ILEX AQUIFOLIUM (English Holly). This is not as hardy as the American Holly (Ilex Opaca) but can safely be planted from New Jersey southward. The foliage is a bright glistening green and the berries are larger than the American. A very beautiful Holly.

HORTUS. By L. H. and Ethel Z. Bailey.

Easy to use, accurate and non-technical. This great book comes closer than any other single volume to answering every question about gardening. It includes every kind of ornamental fruit and vegetable plant grown today with brief but complete information on their uses, cultivation, hardiness, propagation, preferred soil, color, identification, etc. Common names are used throughout, all botanical names are defined, and the book is so conveninently arranged and compressed that it is marvelously easy to handle. 35 illustrations, 652 pages. This book has just been reduced from $10.00 $5.00 postpaid.

HARDY HYBRID RHODODENDRONS

Most everybody agrees that Rhododendrons are among the most showy of all the flowering plants, and most everybody would also like to grow some but the price has always been a great drawback to quantity planting. We believe you will find our prices low enough so that you can resell them at a fair price and still make a good profit. This collection is among the very best of the hardy hybrid varieties; all good growing and good flowering kinds. Push them a little and see how your sales increase.

Send us a trial order for Rhododendrons. We know you will like what we send you.

Taxus (Yew)

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (Taxus Baccata) is not reliably hardy in the north and many do not realize that the Japanese and many forms of Media are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil excepting it should not be too wet, but they do appreciate a plenty of good plant food. They are immune to many plant diseases and insects so destructive to many other evergreens.

The Yew in its many species and forms can be well used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

All Lining-Out sizes are marked by an *. Sizes not so marked are classed as Specimen Stock.

	Each	10	100	1000
TAXUS BACCATA (English Yew). Widely planted in English churchyards. A good ornament. Hardy as far north as New York City. Upright, dark green foliage. Very good for the South and where it is hardy.

TAXUS CANADENSIS (Canadian Yew). Low hsrub usually diffuse and struggling but occasionally ascending and up to 6 feet tall. The hardiest of the Yews, but less handsome than the other species, one of the chief drawbacks being the reddish tinge the foliage assumes in winter.

* 4 to 6 in. trans.		$1.25	$10.00
* 6 to 8 in. trans.		1.50	12.50

TAXUS CANADENSIS (Canadian Yew). Low shrub usually dipose in which evergreens are required the Japanese Yew can be recommended. Perfectly hardy in New England and Ontario, immune from most diseases and pests. Accomodating to an extraordinary degree, withstanding shade or full sunshine, dark green at all seasons of the year. Small wonder this plant has been acclaimed "Japan's greatest gift to the garden of America." Under this heading we are offering the spreading or wide growing type which grows as broad or broader than tall.

MORE HATFIELD YEWS

The following varieties were grown from stock purchased form the late T. D. Hatfield. He selected these as being the best of his unamed varieties and we are still carrying them under his orignal numbers. No. 18 is one of the most rapid growers of the lot and we believe it will make one of the best for hedges. All of them are good.

Strawberry Plants

You should get ready for a big Strawberry business this season. Berries sold well in most sections last season and the growers made money on them, this will cause a demand for the plants this season. We will be glad to tell you the best varieties to push and help in you any way.

We have a very nice lot of plants to offer this season and will ship to you or direct to your customers under your tags. Shipping direct to your customers saves you the handling and carriage charges and delivers the plants to your customer in a fresh ready to grow condition.

Let us take care of your Strawberry plant orders this season. We have had 30 years growing and packing experience with strawberries. Our Strawberry plant business is handled entirely separate from our other nursery stock.

Our plants will give you and your customers satisfaction.

Let us quote you on your requirements.

AROMA. This is one of the old reliable midseason to late varieties and extensively planted in many sections. Produces large crops of perfect shape light red berries with a bright green cap.

BIG JOE. In a list of the five best varieties you will most always find Big Joe. Ripens in midseason. Does well on most all types of soil, plant very vigorous, and productive of large, bright red berries with a large green cap; good shipper and a good seller.

BLAKEMORE. Another early variety developed by the U. S. Department of Agriculture and we believe it the best of all the early berries where it does well. However, it does not seem to do as well as the Premier in some sections. A cross between Premier and Missionary; a good plant maker; a heavy producer of bright red berries, ripening a little ahead of Missionary; bright green caps; medium to large, round to conical; firm and a good keeper and shipper.

CATSKILL. An introduction of the New York Experiment Station. Highly recommended and not nearly enough plants of it to supply the demand last season. The largest and most productive of all the midseason varieties. Considered the best midseason variety. You will be safe in pushing Catskill especially for northern growers.

CHESAPEAKE. This is the finest dessert berry of the late varieties and will keep better and sell at higher prices than any other late berry we know of. The fruit is large and handsome and will stay so until the end of the fruiting season. Berries are a rich glossy red with bright yellow seed, have a large green cap and are very uniform size. Chesapeake is firm and will carry to the markets in the best of condition.

GANDY. Forty-eight years old and still good as an extra late berry if given a good fertile moist soil. The berries are strictly fancy, large, good quality, bright red with a large green cap. A good keeper and shipper.

DORSETT. Another early berry developed by the U. S. Department of Agriculture. The berries are medium to light in color firm and of excellent flavor; in fact Dorsett and Fairfax are considered the two best flaovered of all the early varieties. They are both good sellers bringing a premium over all varieties in the markets. They are new varieties, good healthy growers, extra quality fruit, heavy producers, good sellers, and the demand for plants of these two varieties is probably the heaviest of any new variety ever introduced. Push Dorsett and Fairfax this season.

FAIRFAX. What we say about Dorsett also applies to Fairfax with the difference in the color of the fruit; Dorsett is a brighter red than Fairfax but seems to be equally as productive and as good grower. Push Fairfax and Dorsett.

GIBSON. Another old standard midseason variety. Heavy fruiter of bright red berries with an atractive green cap; good for canning and preserving but does not carry well to distant markets.

HOWARD 17. This is so near like Premier that it is hardly possible to tell any difference although some growers think it better.

LUPTON. One would not likely grow this variety if he was going to eat the fruit himeslf as it does not begin to have the quality of some of the others but it is very attractive and shows up so well when it arrives that it most always brings the top prices and this is what the commercial grower is interested in. Good grower, late, attractive and sells well.

PREMIER. For a good many years this has been the best plant seller of them all, hence, has been a profitable one for the berry grower. Early, almost frost resistant, always producing good crops, attractive, good grower, productive, medium to large berries, and if not to wet at picking time a good shipper but if there is a lack of sunshine the berries do not keep well. In some sections they will not plant anything else for a crop of early berries. Plant it; sell it. We have the nicest lot of Premier plants this season that we have ever grown and will appreciate your orders.

SENATOR DUNLAP. The old reliable midseason variety. Still considered very highly in some sections, especially for canning. Our plants are nice this season.

WM. BELT. This is one of the best flavored of the late berries. The berries are irregular in shape, fairly large, bright glossy red with a green cap. For the home garden or local market Wm. Belt is still good.

FALL BEARERS. These berries are now so generally known that it is hardly necessary to say much about them. **Mastodon** is recognized as being the best for commercial purposes. **Champion** or **Progressive** is the old standard one and probabaly the best flavored. **Gem** is one of the newest and very highly recommended by the introducers but does not seem to be anything extra here in the east. **We suggest you make your reservations early as the dry weather has curtailed the crop this season.**

Why bother with packing out Strwberry plants yourself? Let us do it for you. You save the transportation charges, the cost of packing after you receive the plants and your customer receives the plants in a much fresher condition. Tell us how many you usually send and we will quote you a price for filling your orders, to you or your customer.

Asparagus Roots

We are only growing the **MARY WASHINGTON** variety of Asparagus as it seems this is the one nearly every one wants to plant now. It is generally considered the best for growing shipping and eating. We have some nice crowns this season and will appreciate your order.

Native Peat or Humus

To grow Azaleas and Rhododendrons successfully you must have leaf mold, peat in some form or some similar substance. We have used Russian, German and Holland Peat, leaf mold collected from under trees in our local forests, but by far the best material we have ever used is a form of native peat, a deposit of which we have found near here. It runs from twelve to twenty four inches thick and is composed of thoroughly decayed leaves and other material from hardwood trees which has been generations in the making. We fully recommend this for use in growing stock and to use in a mixture of soil and sand in which to sow seeds but we do not recommend it for use in propagating evergreens and other soft wooded shrubs by cuttings.

If you would like to try it we will send you a two-bushel bag for $1.00. Will quote special prices on larger lots. Try a sample bag, we believe you will like it so well you will want more.
